

I am a satellite radio subscriber, and I absolutely love it. Satellite offers me variety and quality that is beyond anything else available. I listen in my car, at home, and all day at work. I pay for this service, and it's well worth every penny. I do not understand why you would even consider passing any law to restrict them in any way. I think you should reject the NAB's petition 04-160. Thank you,

Diane V. Schuch
